Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A smallholder farmer deciding what crop to plant next.	Get a data-backed crop recommendation for my field.	I only have basic soil (N, P, K, pH) and weather readings, not expert advice.	I lack easy access to a local agronomist to interpret my soil and climate data.	Uncertain about choosing a crop that will yield well this season.
