

Brainstorming & Idea Prioritization Template

Date	06-07-2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Ashish Ranjan	Recommend the best crop to grow using soil nutrients (N, P, K) and climate data with a machine learning model.	Machine Learning	1
2	Gayathri Ambati	Suggest fertilizer type and irrigation guidance alongside the crop recommendation.	Agronomy Advisory	1
3	Gayathri Ambati	Connect low-cost IoT soil and moisture sensors so field data is captured automatically instead of typed in.	IoT / Hardware	2
4	Sadana Tondupalli	Pull live weather forecasts from a public weather API instead of relying on manually entered values.	External Integration	2
5	Joshnavi Gooru	Analyze photos of crop leaves to detect disease or nutrient deficiency early.	Computer Vision	3
6	Mallikarjuna Madava Manjula	Add a marketplace connecting farmers directly with buyers for the recommended crop.	Marketplace / E-commerce	3

Step 2: Idea Prioritization

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML-based crop recommendation engine using soil & climate inputs, with fertilizer/irrigation guidance.	High	High	High	Yes
2	IoT sensor and live weather API integration for automated data capture.	Low	Medium	Low	No
3	Disease detection via leaf imaging and a farmer-buyer marketplace add-on.	Medium	Medium	Medium	No
